BATES

Automatic Numbering Machines

AND Line Dating Machines.

They are entirely automatic, every figure disk changing in its consecutive order, from one to full numerical capacity of the machines. The changing from consecutive to duplicate and continuous numbering is effected by the mere moving of the pointer in front of the dial. They work with slight friction and are, therefore, noiseless. They are small and light to handle. Every wearing part is made of steel, including the figure wheels, and are interchangeable to the smallest screw. The figures receive ink automatically from a thick felt pad which is practically indestructible.

The Line Dater.

HOLBROOK'S DIRECTORY—NEWARK

NEW

OF ALL THE WHEELS sold in Newark this year, the "RAMBLER" outshines them all. We have racers, road racers, full road wheels and tandems, all magnificently made and finished by a company whose ability and responsibility is beyond all question. The "PIERCE," at \$75, is quite an interesting mount, as is the "IDEAL," at \$50. Our Power REPAIR SHOP is more fully equipped than any enamelling oven, vulcanizer etc., and many other interesting machines. Our RIDING SCHOOL, too, is quite popular. Come and see us. **NEWARK CYCLE CO.**, 9 and 11 Central Avenue.

The object of this institution is to reform
boys and girls committed by the Police
Justices for truancy and such conduct as
indicates they are beyond the control of
parents. It is a public institution, sup-
ported by the city. It takes children vi-
ciously inclined, and inures them to habits
which tend to lives of usefulness. The
Home is in no sense like a prison, but the
intent is to make it what its name implies
—a "home" for wayward children.

PREFACE.

The Directory of a city is to that city its most important book production. In a large majority of instances it is the only book ever put in circulation for that place. It bears the name of the place, and it contains the names of all its families. It is in fact the record that shows its growth in population, in civic institutions, in religious organizations, in social, fraternal and benevolent associations. More than that, it clearly depicts the business character of the people. If they are enterprising, progressive, alive to all the advantages that increase business, its pages are filled with their advertisements, attractively worded, tastefully arranged. A Directory then contains the foundation of the work of the future historian, and at the same time is a daily guide book to the citizen, the tradesman and to the stranger.

To be all this it must have publishers who are acquainted with the business, and they must have the unequivocal co-operation of all classes. In this volume of Harrison, Kearny and Arlington these elements are happily combined and the result is the production of a work that is so bright, clean and prosperous in its appearance that it wins its way directly to the hearts of every one that turns to it for information, and to these it truthfully gives the impression that these are growing, thriving towns. Just the places for business men to locate and admirably adapted for residential purposes.

While speaking of the latter subject a word should be interjected in regard to Arlington's peculiar advantages in this line. Situated as it is upon an eminence, in sight of New York, with the Passaic and the City of Newark at its back door, it combines purity of atmosphere, beauty of landscape, facility of travel, in such high degree that it is at once placed beyond comparison with any of its neighbors.

A note should be made that the two Directories heretofore published in this field are now combined in this one, which will be known as the Boylan & Macdonald Harrison, Kearny and Arlington Directory, published by The Holbrook Newark Directory Co.
